

PRESS RELEASE

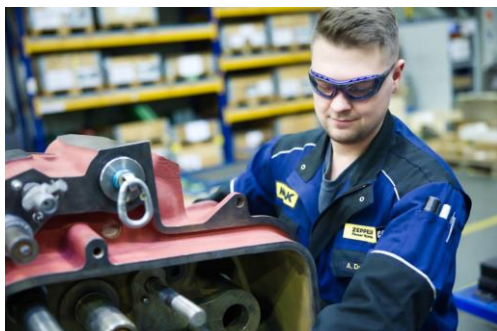

Zeppelin Power Systems will continue to offer a comprehensive MaK service business

Hamburg, July 26, 2021. Zeppelin Power Systems will remain on hand to support its customers as a reliable partner and will continue its service and spare parts business for Caterpillar MaK engines. The manufacturer Caterpillar and official Zeppelin partner had announced on July 7, 2021, that it would phase out production of new medium-speed MaK engines at its sites in Germany and China by the end of 2022, and that it would focus exclusively on after-sales service in the future.

Zeppelin Power Systems will therefore no longer sell new MaK-brand engines in the future, but it will fulfill existing orders and remain fully available to its customers with its worldwide service network. In cooperation with Caterpillar, the company will continue to offer customized service agreements and services for existing MaK engines. These include maintenance, repairs, original MaK spare parts, mobile technicians on site, and digital solutions such as real-time analyses of engine operating data. Zeppelin Power Systems has its own MaK workshops and a comprehensive in-house parts store. In addition, the company offers a complete range of services for turbochargers as a certified service center for the Napier and KBB brands.

MaK is known as a leading provider of premium marine engines and generator sets for the power plant, ferry, cruise, cargo, fishing, governmental, tug and salvage, and dredging segments for both inland waterways and offshore. Its product line features diesel, gas, and dual-fuel engines, including main propulsion engines ranging from 1,020 to 16,800 kW and generator sets ranging from 979 to 16,111 kWe.

About Zeppelin Power Systems

Zeppelin Power Systems is the official partner of Caterpillar for Cat and MaK engines and a leading provider of drive, propulsion, traction and energy systems and has been partnering with Caterpillar for more than 70 years. With over 1,000 employees, Zeppelin Power Systems offers its customers individual, highly efficient system solutions with comprehensive services for industrial and marine applications, the oil and gas industry, rail vehicles and power generation. Digital products for all segments as well as system components and solutions for ballast water treatment complete the portfolio.

About the Zeppelin Group

The Zeppelin Group offers solutions for the construction industry, drive systems and energy sectors as well as engineering and plant engineering; it is represented in 43 countries and regions around the world at more than 220 sites. The company's approximately 10,000 employees work together in a management holding company, six strategic business units and a strategic management center (= Zeppelin Digit): Construction Equipment Central Europe, Construction Equipment Nordics, Construction Equipment Eurasia (distribution and service of construction, mining, and agricultural machinery), Rental (rental and project solutions for construction and industry), Power Systems (drive, propulsion, traction, and energy systems), Plant Engineering (engineering and plant engineering) and Zeppelin Digit (IT and digitalization). All digital business is handled together within Zeppelin Digit. In the 2020 financial year, the Group generated sales of EUR 3.3 billion. Zeppelin GmbH is the Group holding company. It is legally domiciled in Friedrichshafen and has its head office in Garching near Munich. The Zeppelin Group is a foundation-owned company. Its roots can be traced back to the establishment of the Zeppelin Foundation by Graf Ferdinand von Zeppelin in 1908. For more information, visit zeppelin.com.
