CUSTOMER VALUE AGREEMENTS
Hassle-Free Service Maintenance Agreements

REDUCE COST
INCREASE UPTIME

With our marine digital portfolio of services, Ferry owner-operators can monitor the health and efficiency of their vessels and predict problems before they happen. Using data and inspections to reduce downtime, owner-operators can also reduce operating costs and make compliance reporting easier with better monitoring of their assets and operations.

MARINE DIGITAL SERVICES
POWERS FERRY EFFICIENCY

The Cat Marine service offerings for the ferry segment spans from remote monitoring of individual assets to full Fleet Advisory services, leveraging qualified data to make the best decisions possible. The majority of these services are not limited to Cat engines, but can be extended to other non-Cat supplied equipment, providing a total vessel and total fleet solution.

HEALTH & OPERATIONS MONITORING SERVICES

Health & Operations Monitoring Services, enabled by Cat Remote Fleet Vision, gives you the customized data you need to identify and resolve problems quickly—often before they result in costly repairs and unscheduled downtime. Choose the features that best fit your goals. Whether you aim to improve efficiency, reduce risk, cut costs or boost your bottom line, the data is at your fingertips through any Satellite, cellular or local network connection.

- Remote Monitoring data enabling near real time view of your assets current operations

- Trending and data visualization to help decipher equipment issues

- Fuel monitoring providing insight into fuel consumption

- Standardized & Customized Reporting to summarize operational profiles

- Alerts & Notifications allowing all stakeholders to be aware of any current issues

PREDICTIVE MAINTENANCE SERVICES

Predictive Maintenance Services, enabled by Cat Asset Intelligence, makes the data work for you so you're left with the facts to make better business decisions sooner. Cat Asset Intelligence brings together data from a wide variety of sources into a single platform, providing a deeper understanding of how all of your equipment and sites are performing so you stay ahead of potential issues and make better informed decisions.

- Advanced predictive analytics enabling early insights into the efficiency and operations of your equipment

- Automated and predictive recommendations providing data driven action for your vessels and fleet

- Fuel optimization providing insight on ways to best operate to save fuel costs

- Standardized & Customized Reporting to summarize operational profiles and recommendations for increased fleet efficiency

- Alerts & Notifications allowing all stakeholders to be aware of potential upcoming issues

- Fleet Advisory services enabling Caterpillar's experts to provide customized recommendations and support for your vessels and fleet
