

## **PRESS RELEASE**

### **Zeppelin Group to exhibit its latest drive solutions at Agritechnica**

**The Zeppelin Power Systems business unit set to showcase Cat engines that comply with EU-Stage V emission standards**

**Hamburg, November 3, 2017. Zeppelin Power Systems, the official partner to Caterpillar, is presenting its latest generation of engines from November 12 to 18, at Agritechnica trade fair in Hanover. The experts in drive and engine systems will be at stand D10 in Hall 16, providing information about Cat engines, as well as EU Stage V emission standards which will apply from 2019, and customized, integrated solutions. Visitors will also be able to seek advice about electric drives for agricultural equipment.**

Zeppelin Power Systems will be showcasing three selected exhibits, the C13B, the C2.8 and the C9.3B industrial diesel engines. These can be used in a number of sectors and applications such as agriculture and forestry, fruit harvesting, earthmoving and for irrigation systems; they comply both with EU Stage V emissions standards (applicable from January 1, 2019), and EPA tier 4 final for off-highway machines and vehicles. The C13B which will be presented for the first time will be on offer with nominal outputs of 340-430 kW and speed of 1800-2100 rpm, while the C9.3B will have 250-340 kW at 1800-2200 rpm. The C2.8 is available with nominal outputs of 45-55 kW at 2500 rpm. When visiting the stand, visitors will also be able to inspect a vintage Holder tractor which has been converted and fitted with electric drive, and to talk about eMobility. Zeppelin Power Systems is currently working on a number of different projects within the field of electrification, and these will involve exciting product innovations in the future.

#### **Worldwide service, around the clock**

At its stand, Zeppelin Power Systems will also provide information about the extensive service that is already trusted by many leading engine manufacturers operating in the industrial and agricultural engineering sectors. The company provides customized inspection and maintenance plans for prevention and early detection. These ensure that agricultural machinery operates reliably. Four Zeppelin Power Systems service centers and about 40 additional locations in Germany, as well as three service centers and five locations in Austria, ensure maximum availability. The Caterpillar dealer network is also available worldwide, 24 hours a day, and seven days a week. Spare parts and professional product support are available at more than 1,800 locations, and offer high quality and consistent service.

## **About Zeppelin Power Systems**

Zeppelin Power Systems is the official partner of Caterpillar for Cat, MaK and EMD engines and a leading provider of drive, propulsion, traction and energy systems and has been partnering with Caterpillar for 60 years. With about 800 employees, Zeppelin Power Systems offers their customers individual, highly efficient system solutions with comprehensive services for industrial and marine applications, the oil and gas industry, rail vehicles and power generation.

## About Zeppelin Group

Zeppelin Group operates 190 sites around the world. In the 2016 fiscal year, its around 7,700 employees generated sales of 2.36 billion euros. Group-wide collaboration in Zeppelin Group revolves around a management holding company and six strategic business units: Construction Equipment EU (sales and servicing of construction machines), Construction Equipment CIS (sales and servicing of construction and agricultural machines), Rental (rental and project solutions for the construction and industry sectors), Power Systems (drive, propulsion, traction, and energy systems), Plant Engineering (engineering and plant engineering) and Z Lab (new digital business models). Zeppelin GmbH is the Group holding company. It is legally domiciled in Friedrichshafen and has its head office in Garching near Munich.
