

PRESS RELEASE

Zeppelin at Light + Building

Zeppelin Power Systems presents reliable island mode systems

Hamburg, January 18, 2018. Zeppelin Power Systems will be presenting solutions for emergency power supply in hall 9, stand C95 at *Light + Building*, the world's leading trade fair for lighting and building technology, from March 18-23, 2018. The island mode systems being presented are back-up systems for the reliable supply of electrical energy around-the-clock and are constructed in Germany.

Zeppelin Power Systems offers customized systems from 200 to 4,000 kVA, installed either in a building or in a container as a mobile solution. Zeppelin Power Systems is a general contractor which handles entire emergency power and continuous current projects, from project engineering to handover of the turnkey system; including engineering, implementation planning, power generator delivery and plant construction, all from one source.

The company has been providing a broad portfolio of power units for power production, reliable island mode system solutions and comprehensive services. The areas of application for its products include data centers, hospitals, the processing industry, larger industrial premises and energy suppliers, the automotive, chemical, pharmaceutical and food industries, and logistics and traffic control systems companies.
